00420 HYBRID III WASH

INNOVATIVE MULTI PURPOSE WASH

Application

Hybrid III Wash is a new low VOC automatic or manual roller and blanket wash suitable for any press running UV ink, UV Hybrid or Conventional ink or coatings.

Benefits

Suitable for all ink systems. Provides full flexibility by eliminating multiple products for different ink systems. Excellent cleaning power, virtually zero odour and water miscible.

Instructions

Add directly to automatic wash unit reservoir. Can also be used for manual blanket or roller washing. Maximum economy and is obtained by mixing with water during wash cycle or by hand up to 50%.

Always apply minimal amount of product in wash cycle with final rinse of water. Inbuilt rubber conditioners maintain rubber and reduce durometer creep. Best combined with 00426 Allstar IPA Free fount.

“Hi tech solutions for tomorrow developed today”

Fluid Technologies

Committed to excellence and distinguished by high quality innovative technology in press-room chemistry.

Currently leading the way in Australia with Environmentally Friendly solutions.

Fluid Technologies has a sole focus on pressroom chemistry and nothing else. Partner with the true press chemical professionals for superior products, and exceptional service!
