

PLATE CARE PRODUCTS

FOR ALL CTP AND CONVENTIONAL PLATES

Without doubt the modern lithographic printing plate is at the heart of all production.

The technology involved has developed significantly to the extent that the products used for regular scratch removal and cleaning need to be very specific and refined. Materials and methods used in the past are no longer suitable.

As such Fluid Technologies has assembled the worlds best product to safely suit every application and successfully tested on Kodak, Agfa, Fuji and most other plates.

00446 Special Gum Washout: One step fast ink removal. Safe for all ctp plates and very easy to use. Also suitable for short term plate protection.

00455 Extra Plate Cleaner: Slightly more abrasive cleaner for scratch removal. One application removes ink, oxidation and scratches.

00457 Ultra Plate Cleaner: Conventional mild cleaner for scratch removal. One application removes ink, oxidation and scratches.

00474 A-Gum: The real original arabic style plate gum. Suited to short or long term plate storage. Can also be used as a finishing gum in plate processors by reducing with water.

Application Tips: Apply products with clean damp sponge and rub into plate gently. Remove residues with second clean damp sponge. For best results complete process by applying Gum Arabic and buff well until smooth and dry.

Best used with:

00426 Allstar IPA Free Fount. A truly unique, one step IPA free fount. The most successful product ever in Australia. Suited to all presses for improved environmental profile.

00421 Bluefount IPA Free Fount. Fully FOGRA & Heidelberg approved one step IPA free fount. Suited to all presses and applications. Super concentrated and low dosage rates.

Only with the innovators: Fluid Technologies
