

# ROLLER CARE PRODUCTS

## FOR INK AND DAMPENING ROLLERS

Without doubt the modern lithographic roller system is at the heart of the press. Combining sophisticated rubber compounds and specific durometers they are expensive and should be maintained accordingly.

The technology involved in products used for glaze, calcium removal and cleaning now need to be very specific and refined. Materials and methods used in the past are no longer suitable. And may in fact cause damage.

As such Fluid Technologies has assembled the worlds best products to safely suit every application and has been successfully tested on Brissett, Bottcher and most other brand name roller compounds.

**00472 Superclean Paste:** Premium product for one step deep pore glaze removal. Safe for all inking rollers and suitable for quick colour changes.

**00436 Relief Decalcify:** Specifically formulated for calcium removal. One application rapidly dissolves and removes deep deposits. Waterbased.

**00441 A3 Deglaze:** Super effective aggressive solvent for fast glaze removal in one product. Weekly treatment maintenance product.

**00435 MRC 88:** Safe cleaner for all metering and form dampener rubber compounds. Will not destroy even the softest IPA free rubbers.

**00601 Spray N Lube:** Innovative super high performance synthetic oil blend for easy "spray on" protection of all inking rollers when not in use.
